

Deals - Manager - Valuations, Forensics & Disputes

pwc

Become a manager on our *Valuations, Forensics and Dispute* team at the Montreal office.

Description

The **Valuations, Forensics and Dispute** team offers creative solutions and ideas to increase value for clients that are in a critical period or that need to make major strategic decisions. The expansion of the group and growing demands of clients require us to add a consultant to our team. Within the Deals group, the *Dispute Analysis and Valuation* team offers our clients two basic types of value-added services: valuation and dispute analysis.

Valuations are done for a variety of reasons, such as to determine prices for transactions, tax or succession planning, or regulatory reporting obligations, to value intangible assets for accountability purposes, etc. As part of dispute analysis, we provide loss valuation and financial analysis services to a wide range of clients, including law firms, large corporations and insurance companies. They use our services when they need a precise and independent financial evaluation of potential losses and occasionally an expert witness in court.

Criteria

- You have **3 to 5 years of experience** in the field of accounting, finance and business.
- You have mastered generally accepted accounting principles (GAAP) and general principles involved in finance and Canadian taxes.
- Experience in managing and coaching teams and ability to work in teams.
- You are recognized for your analytical ability, critical capacity, your ability to easily adapt to unfamiliar situations, your interpersonal skills and excellent communication skills, both written and oral, in French and in English.
- Ability to establish excellent client relationships with existing clients and involve in business development initiatives and strategies.
- You have an accounting designation (**CA ideally**) and/or a recognized finance title. Having or being in the process of obtaining the CBV, CFA or CA • IFA designations is a definite plus
